

**Date:** Tuesday 26th March 2013

**Time:** 14:00-15:00 CET, 13:00-14:00 GMT

**Online meeting:** Google+ Hangout

**Present:** Jakob (until halfway), Sara, Yuri, Matthijs, Sion, Rick.

**Jabber:** xmpp:opendnssec@conference.kirei.se

### 1. Who will write minutes?

Poor Rick.

### 2. Agree on the agenda.

All agree

### 3. Project actions

Issue	What	Who	Status
OPENDNSSEC-132	Benchmarking system for a random TLD	Sara Dickinson	 In Progress
OPENDNSSEC-121	Review versioning system used and document support timeline for older versions  The board is in favour, but we wonder how to handle support of old versions when 1.4 is released.  We expect many will continue to use 1.3 because it works reliably for them. It might make sense treating it as a version with long-term support, and treating 1.4 more as a developing version.  <b>ACTION, Sara:</b> Propose this to the board.	Sara Dickinson	 In Progress
OPENDNSSEC-133	Regression testing/requirements  There now is a weekly clean & rebuild in place, to thwart spurious errors.	Sara Dickinson	 In Progress
OPENDNSSEC-382	Review all the issues in JIRA  There are 55 issues in JIRA, which Sara intends to bundle into smaller packages that she will ask everyone to look over.	Sara Dickinson	 In Progress
OPENDNSSEC-131	Find a sparac box  We have one configured and running, but it does not work under all possible configurations.	Sara Dickinson	 In Progress

### 4. OpenDNSSEC

- **OPENDNSSEC Unassigned issues**

- All unassigned open issues
- None 😊

- **SUPPORT Open issues**

- All unresolved Support issues
- 28: No attention needed for 1.4.0
- 39 and 41: Related to 1.3 and in lieu of further input these issues have not been further developed.
- None of the open issues is blocking a release of 1.4.0 at this time

- **OpenDNSSEC 1.3.14**

- *Nominate any issues for 1.3.14?*
- *All issues for 1.3.14* (also check the NEWS file)
- *Should we release?*
  - *We have no reason to release a 1.3.14 version.*

- **OpenDNSSEC 1.4.0**

- *Actions*

<b>Nick</b>	Investigate validns and how we could use it (OPENDNSSEC-143). <i>Stays open.</i>	IN PROGRESS	
-------------	--	-------------	--

- *Updates?*
- *All issues for 1.4.0* (also check the NEWS file)
  - *#387 - it may be that Jerry has some time for this soon.*
  - *#332 - This is a triviality*
- *Planned Release date:*
  - *1.4.0rc4*
    - *We see no reason to release an rc4 at this time, before going to the real 1.4.0 version.*
  - *1.4.0*
    - *Users have tried 1.4.0 and reported on it, but recently there has been no new input. We are not sure if this indicates lack of problems of lack of users.*
    - **ACTION, Sara:** *Ask on the users' list whether people are using 1.4.0 and if so, what functionality they are using.*

- **OpenDNSSEC 1.4.x**

- *All issues for 1.4.1*
  - *We discuss which issues would introduce new functionality (which is the case for #390 #358 #296) and would therefore be picked up in 2.0 or perhaps in an intermediate 1.5 version.*
  - *Other issues could also give rise to a version bump*
  - *We rank those issues under 2.0 with a special tag, and will copy or move them to 1.5 if we'd decide to bring out such a version*
  - *At present, we do not foresee a 1.5 version; if a need was felt we probably would not let it block progress on 2.0*

- **OpenDNSSEC 2.0.0b1**

- *Actions*

<b>Yuri</b>	Talk to Sion to discuss possible solutions for implementing <BackupRequired> <i>This action is now fully implemented and can move to CLOSED</i>	IN PROGRESS	
<b>Yuri?</b>	Align enforcer-ng jenkins testing with trunk.	OPEN	
<b>Sara</b>	Look into additional DB support for 2.0	OPEN	

- *Updates?*
- *Open issues for 2.0.0b1*
- *Regression & System testing coverage*
- *Planned Release date:*

- **Testing**

<b>Sion/Sara</b>	<i>Sion is going to use Jerry's instructions to run the tests on a physical 64bit FreeBSD machine to see if we see the same problems there. Sara to email the users list to see if any there has every seen this.</i> <i>The FreeBSD machine is actually a VM; Sion and Sara are still battling crashes on the platform.</i>	IN PROGRESS	
------------------	---	----------------	--

- **General updates**

- *Roadmap review - webpages need updating as timelines are out of date*  
**ACTION, Sara:** Update the road map with new times. 2.0 is probably pinned around 2014, although nobody seems inclined to take such figures too seriously (or is expecting readers to take them without a grain of salt).

- 

<b>Sara</b>	<i>Sara to email developers/Doodle to arrange developer meeting around RIPE 66</i>	IN PROGRESS	
-------------	--	----------------	--

\* Rick proposes better parent/child support integration

The discussion is taken offline for practical reasons, Rick and Matthijs will talk about it.

## 5. SoftHSM

### Actions

Who	What	Status	When
-----	------	--------	------

- Updates?
- Releases:
  - *SoftHSM 1.3.5*
  - *SoftHSM 2.0.0*

## 6. Next meeting

Tuesday 9th April, 14:00 CET

## 7. AOB

Rick tells that SURFnet is looking at DANE, and at possibilities of automating it to work together with OpenDNSSEC.
